

Family Migration Context and Socialization, and Children’s Socio-emotional Development Study-2024

The purpose of this study is to understand the impact of family migration context on children’s and adolescents (aged 10-23) socio-psychological competence, expectations, relationship and behaviors. In this study we have collected the data about children's interactions with family and friends, relationships with others, expectations, and their achievements. The survey was administered in a Computer Assisted Personal Interview (CAPI) format.

There are 4 major interview types (Household, child, mother, and father) in this study. Major variables that we propose to collect through these interviews include measures of children’s health, socio-emotional development, and family migration. To meet the study goal, we have collected data

The purpose of the Screener survey was to collect information on child’s interactions with family and friends, relationships with others, expectations, and achievements

Out of 2120 children’s mother, 1931 were interviewed resulting in a 92.75% completion rate 189 interviews were incomplete which includes 45 refusals, 29 Household/Respondents moved outside Chitwan within Nepal, 26 households/Respondents could not locate, 1 Interview Incomplete within NBH, 34 Household/Respondent moved outside Nepal, 17 Household/Respondent moved within Chitwan,

The project was led by Principal Investigator Prof. Dr. Natali D. Eggum, Arizona State University, USA, Prof. Dr. Dirgha Jibi Ghimire, Population Studies Center, University of Michigan, Executive Director ISER-N, Prof. Dr. Scott T. Yabiku, Pennsylvania State University, USA and Prof. Dr. Jennifer Elyse Glick, USA.
